

Pending Postdoctoral Support:

Proposal Title: What Regulates the Physical Conditions in the Galactic Center?
 Source of Support: NSF Astronomy and Astrophysics Postdoctoral Fellowship
 Project Location: National Radio Astronomy Observatory/ New Mexico Tech
 Total Award Amount: \$267,000.00
 Starting Date: 08/01/12
 Ending Date: 07/31/15
 Support Type: Submitted

Proposal Title: What Regulates the Physical Conditions in the Galactic Center?
 Source of Support: Postdoctoral Fellowship in Astronomy
 Project Location: ESO- Garching
 Total Award Amount: "Competitive salary and allowances, benefits, and relocation"
 Starting Date: 08/01/12
 Ending Date: 07/31/15
 Support Type: Submission Planned in Near Future

Proposal Title: What Regulates the Physical Conditions in the Galactic Center?
 Source of Support: CfA Postdoctoral Fellowship
 Project Location: Harvard/Smithsonian Center for Astrophysics
 Total Award Amount: \$244,500.00
 Starting Date: 08/01/12
 Ending Date: 07/31/15
 Support Type: Submission Planned in Near Future

Proposal Title: What Regulates the Physical Conditions in the Galactic Center?
 Source of Support: Jansky Fellowship
 Project Location: National Radio Astronomy Observatory
 Total Award Amount: \$219,000.00
 Starting Date: 08/01/12
 Ending Date: 07/31/15
 Support Type: Submission Planned in Near Future

Proposal Title: What Regulates the Physical Conditions in the Galactic Center?
 Source of Support: ASTRON Postdoctoral Fellowship in Astronomy
 Project Location: Netherlands Institute for Radio Astronomy
 Total Award Amount: "Salary commensurate with experience + benefits"
 Starting Date: 08/01/12
 Ending Date: 07/31/15
 Support Type: Submission Planned in Near Future

Proposal Title: Star-formation Chemistry in the Galaxy's Central Molecular Zone
 Source of Support: Postdoctoral Fellowship in Astronomy
 Project Location: Leiden Observatory
 Total Award Amount: "Civil servant pay with full benefits"
 Starting Date: 08/01/12
 Ending Date: 07/31/15
 Support Type: Submission Planned in Near Future

Proposal Title: High-mass star formation in the Galaxy's Central Molecular Zone
 Source of Support: Postdoctoral position in Astronomy
 Project Location: Boston University
 Total Award Amount: Unspecified, with benefits
 Starting Date: 08/01/12
 Ending Date: 07/31/15
 Support Type: Submission Planned in Near Future

Proposal Title: What Regulates the Physical Conditions in the Galactic Center?
 Source of Support: Bolton Fellowship
 Project Location: CSIRO
 Total Award Amount: \$225,000.00 + Research allowance, benefits
 Starting Date: 08/01/12
 Ending Date: 07/31/15
 Support Type: Submission Planned in Near Future

Proposal Title: An ALMA Probe of Barriers to Galactic Center Star Formation
 Source of Support: Postdoctoral position in Astronomy
 Project Location: North American ALMA Science Center
 Total Award Amount: Unspecified, with benefits
 Starting Date: 08/01/12
 Ending Date: 07/31/15
 Support Type: Submission Planned in Near Future

Proposal Title: What Regulates the Physical Conditions in the Galactic Center?
 Source of Support: Research Fellow in Planet and Star Formation
 Project Location: Max-Planck Institute for Astronomy
 Total Award Amount: Unspecified.
 Starting Date: 08/01/12
 Ending Date: 07/31/15
 Support Type: Submission Planned in Near Future

Proposal Title: What Regulates the Physical Conditions in the Galactic Center?
 Source of Support: STARFORM Postdoctoral Fellowship in Astronom
 Project Location: ETH Zurich
 Total Award Amount: Unspecified, with benefits
 Starting Date: 08/01/12
 Ending Date: 07/31/15
 Support Type: Submission Planned in Near Future

Proposal Title: What Regulates the Physical Conditions in the Galactic Center?
 Source of Support: Dunlap Fellowship
 Project Location: University of Toronto
 Total Award Amount: Unspecified
 Starting Date: 08/01/12
 Ending Date: 07/31/15
 Support Type: Submission Planned in Near Future

Proposal Title: What Regulates the Physical Conditions in the Galactic Center?
 Source of Support: Lindheimer Fellowship
 Project Location: Northwestern University
 Total Award Amount: \$240,000.00 plus competitive benefits
 Starting Date: 08/01/12
 Ending Date: 07/31/15
 Support Type: Submission Planned in Near Future

Proposal Title: Modeling the Physical Conditions in the Galactic Center
 Source of Support: Postdoctoral Research Associate in Interstellar Medium Studies
 Project Location: University of Wisconsin
 Total Award Amount: Unspecified
 Starting Date: 08/01/12
 Ending Date: 07/31/15
 Support Type: Submission Planned in Near Future

Proposal Title: What Regulates the Physical Conditions in the Galactic Center?
 Source of Support: Grainger Fellowship
 Project Location: University of Wisconsin
 Total Award Amount: \$216,000
 Starting Date: 08/01/12
 Ending Date: 07/31/15
 Support Type: Submission Planned in Near Future

Proposal Title:	A CARMA Probe of Barriers to Galactic Center Star Formation
Source of Support:	Postdoctoral Scientist Position in Astronomy
Project Location:	University of Illinois
Total Award Amount:	Unspecified
Starting Date:	08/01/12
Ending Date:	07/31/15
Support Type:	Submission Planned in Near Future
