ESO Headquarters
Karl-Schwarzschild-Str. 2
85748 Garching bei München
Germany

Dear Sir or Madam:

I am applying for the ESO fellowship program at Garching. My curriculum vitae, a statement of my future scientific plans, and a description of my observing and technical experience are enclosed for your review. Given my extensive research background and excellent technical capabilities I would appreciate your consideration for this job opening. My ongoing research projects to study the Galactic center and my extensive radio and millimeter observing experience are an ideal match for the research environment of ESO, and will allow me to contribute significantly to science operations support of ALMA.

Sincerely,

Elisabeth Mills
